

## Walter Xtra•tec® F4041 shoulder mill

The Walter Xtra•tec® F4041 shoulder mill is a unique, highly positive tool that combines the advantages of negative, stable indexable inserts with those of positive indexable inserts. The most diverse of corner radii are available. A special geometry for aluminium machining and a universal insert geometry is available for steel and cast iron machining.

### Facts and advantages:

- > unique, spiral-shaped indexable insert for precisely 90° with 4 cutting edges per insert
- > maximum process reliability due to the negative insert seat
- > optimum operational smoothness thanks to the positive rake angle
